

CareerCode Academy

Responsive Web Design (Beginner)

Course Overview

Learn HTML5, CSS3, Flexbox, CSS Grid, responsive design principles, and build real-world projects.

Module 1: Introduction to the Web

How websites work, domains, hosting, browsers, client-server architecture, and development tools.

Module 2: HTML Fundamentals

HTML document structure, headings, paragraphs, links, images, tables, forms, semantic HTML, and accessibility.

Module 3: CSS Fundamentals

Selectors, colors, typography, spacing, box model, positioning, and styling techniques.

Module 4: Layout Systems

Flexbox and CSS Grid layouts for modern websites.

Module 5: Responsive Design

Mobile-first development, media queries, responsive images, and adaptive navigation.

Module 6: Projects

Survey Form, Tribute Page, Technical Documentation Page, Product Landing Page, and Personal Portfolio.

Module 7: Capstone Project

Build a complete responsive website using all concepts learned in the course.

Assessment

Theory examination, practical project evaluation, and portfolio review.

Certificate Requirements

Complete lessons, assignments, projects, final exam, and capstone project.
